SPROOF SECURITY CONCEPT

sproof sign is the digital signature solution from Austria for Europe. We rely on a highly secure infrastructure and state-of-the-art security procedures. Data protection is not an add-on for us, but our mission. Here we show you why our customers have 100% confidence in our security concept and why you can rely on a modern, secure and forward-looking solution with sproof sign.

THE ADVANTAGES OF OUR SECURE EUROPEAN CLOUD OVER HOSTING IN YOUR ORGANIZATION'S OWN DATA CENTER:

After deciding on a company-wide deployment, you start without IT projects or lengthy configuration. You roll out the solution across the entire organization within a very short time. You have no costs for maintenance and servicing. You always use the latest version and do not operate your own hardware. The software runs around the clock in our highly available and highly secure data center. Our IT security and data protection experts guarantee you maximum security without compromise. Any necessary adjustments and changes are implemented immediately and in a targeted manner.

- ✓ **No hardware of your own**
- ✓ **No IT project for installation**
- ✓ **No maintenance effort**
- ✓ **Professional support**
- ✓ **24-hour monitoring**
- ✓ **Full redundancy and backups**
- ✓ **Automatic (security) updates**
- ✓ **ISO 27001 certified data center**

3 REASONS FOR A CLOUD SOLUTION

DATA PRIVACY

sproof sign has its company located in Austria and we store data exclusively in data centres in the EU. We therefore have no relation to third countries when storing data (especially not in the US). Our data centres are ISO 27001 certified and meet the highest standards of IT, data and quality assurance requirements. sproof sign is also awarded by the Austrian innovation platform for public administration. We guarantee GDPR compliance at all levels, both for us and for our subcontractors. We offer our customers these guarantees in a data processing agreement (DPA) based on the EU's standard contractual clauses, which also provides the highest level of legal certainty.

IT SECURITY ASPECTS

sproof sign offers the highest level of IT security. We operate our applications redundantly and fail-safe at several locations in the EU. Your data is kept secure and all connections are encrypted and authenticated. Our applications are subject to constant monitoring and regular internal and external audits and reviews.

ORGANISATIONAL MEASURES

sproof sign implements organisational measures to protect the data and application. Among other things, these regulate access rights and roles, security checks and regular audits. Changes and access to systems are logged and data is deleted in accordance with data protection regulations. Employees are regularly trained in data security and IT security aspects as well as in the handling of personal data.

SUSTAINABILITY

sproof sign has a special focus on sustainability. Our data centre is powered exclusively by renewable energy. We promote energy-saving measures within the company and among our employees, and we support climate-neutral and climate-friendly means of transport. We live the paperless office and also save paper and energy for our customers with our digital signature solution.
